

Reinhard Buchinger

Digital Product Leader · Mobile & Web Platforms, MarTech, CRM & Analytics

Product leader with 13+ years in mobile and web products, most of that time at Runtastic and adidas, from product manager to Director of Product. Built platforms that serve tens of millions of users, with deep expertise in MarTech, CRM, and analytics. Most interested in the consumer journey, from onboarding to the habits that keep people coming back, and in the platforms underneath that make it work. Strong technical background, and ships with AI as part of daily product work. Open to part-time product roles (20h–30h per week).

EXPERIENCE

Interim Head of Product

Apr 2026 – Aug 2026 | Movesmethod (Bondi Moves Pty Ltd), remote, part-time

Mobility & injury-prevention coaching business with 107,000+ customers in 50+ countries; the app brings its coaching method to mobile. 6-person app product & engineering team in a ~250-person organization.

- Owned the new mobile app end to end, taking it from closed beta to App Store submission readiness (compliance, monetization, analytics) on schedule
- Ran a two-cohort beta with ~390 testers as the launch's decision engine, using AI-built research surveys to surface what users needed and reshaping content strategy and launch scope on the evidence
- Set up the monetization and measurement foundation: RevenueCat alongside SuperWall for subscriptions, Sentry for stability, and end-to-end funnel instrumentation in Mixpanel to ground post-launch decisions in real numbers
- Established quality controls for AI-assisted content across the exercise catalog, combining coach review, a style guide, and automated checks to replace generic machine-generated copy with plain language
- Introduced the team's product operating model: weekly cycles, stand-ups, and Linear as the single source of truth for planning and delivery

Parental leave

Oct 2025 – Mar 2026

Director of Product

May 2021 – Sep 2025 | adidas (Runtastic), Linz, Austria, mostly remote

Scope grew from the Digital Sports product capabilities team to App Foundations for adidas' apps and web; the final year focused on handing over the portfolio after the Linz office closure was announced.

- Owned adidas' in-house server-driven experience platform powering the adidas Running and flagship apps, adidas CONFIRMED, and adidas.com, serving tens of millions of users and cutting rich in-app experience release time from a quarter to days
- Scaled the company-wide admin platform to 20+ micro-frontends contributed by product and engineering teams, making it the standard surface for managing systems across adidas Digital
- Led three product managers and steered distributed engineering across agency and internal teams
- Aligned ownership models, governance, and roadmaps with product, marketing, and engineering stakeholders across Herzogenaurach, Amsterdam, and Zaragoza
- Drove the Next.js replatforming to raise developer productivity and fully decommission the legacy Runtastic.com web platform
- Led the structured handover of the product capabilities portfolio to receiving teams as the last remaining knowledge holder, including systems accumulated over the years such as Contentful, Adjust, and backend services

EXPERIENCE

Head of CRM Technology & Web

Jan 2018 – Apr 2021 | adidas (Runtastic), Pasching, Austria

- Built, recruited, and mentored a diverse team of three product managers and eight engineers across mobile, web, and backend in two locations
- Consolidated a fragmented messaging stack with separate email and device databases into a single Emarsys-based CRM platform delivering 1B+ push notifications annually, removing cross-tool orchestration limits and conflicting campaign reporting
- Steered Emarsys' mobile product roadmap through a strategic client partnership, replacing the PushWoosh integration with in-house push, inline in-app messaging, and a notification inbox
- Cut content update lead time from the 4 to 6 week app-release cycle to on-demand publishing with structured content in Contentful
- Delivered GDPR compliance across a portfolio of 10+ apps, alongside SSO rollout and the adidas rebrand
- Negotiated annual vendor SOWs, securing better terms year over year: more included units, retained discounts, and stable pricing

Growth Project Manager

Jul 2014 – Dec 2017 | Runtastic, Pasching, Austria

- Directed mobile CRM channels, scaling push notification volume to 400M+ annually
- Architected the messaging journey framework for the Runtastic Results app, improving user experience and retention
- Led multi-app deep linking across Runtastic apps and partnered with Facebook's Platform team to improve their SDKs for fitness use cases
- Recruited and mentored five interns, two of whom were hired into full-time positions

Product Manager Web

Oct 2012 – Jun 2014 | Runtastic, Pasching, Austria

- Owned Runtastic.com web product initiatives at 1.5M+ MAU peak as a core member of the cross-functional web team
- Drove membership subscription growth through paywall and promotional banner experiments, refining conversion strategies and in-product messaging

Earlier

Master thesis at Runtastic (2011–2012): Ruby gamification service powering badges and records across Runtastic apps. · Four Red Bull internships (2008–2011) in Global Marketing & Sales Apps and Web Services, incl. US assignments in Santa Monica, CA.
